Mirae Asset Sharekhan Diwali Picks 2026 (Samvat 2083)

Dear Investors,

Samvat 2082 has been a roller coaster ride! The Nifty 50 has slid ~12% in the year gone by, weighed by a multitude of externalities, even when India saw some consequential reforms unfold - GST 2.0, labor codes, etc. Until war clouds gathered in West Asia placing energy prices on the boil, Indian equities had a resilient ride. Though equities headed south, India's economy braved the tough times, with real GDP growing 7.8%, as the reform push helped us absorb external shocks. Corporate earnings too have surprised positively across several pockets.

Yet, the hard times may not be over yet. Geopolitical uncertainties persist and high energy prices could pressure India's current account, the rupee, drive up inflation and hit margins in energy-intensive sectors. Rising US Treasury yields is another risk, which hint at elevated interest rates for longer, which would make capital costlier and reduce' equities attractiveness for global investors. Inflation and interest rates are worries creasing India's brow too, with a weak monsoon stoking food price pressures. India's CPI is at ~5.5% and is likely to harden from this level, implying another 50 bps of rate hikes in the current cycle. All the above factors could shrink the scope for valuation re-ratings, which puts earnings growth in the spotlight.

The year ahead is not without silver linings though. The correction has improved risk-reward materially. Although valuations are not uniformly inexpensive, there are pockets where valuations have corrected much more than what the earnings outlook suggests. The Nifty 50's one-year forward multiple at ~17x is lower than 10-year average.

Sectors such as banks and IT are at attractive valuations and should outperform markets next year. Structurally, pharmaceuticals, defence, and capital goods (T&D space) offer long-term opportunities, supported by superior earnings visibility. Earnings, thus, ultimately, remain the bedrock of equity returns across cycles. Corporate earnings have remained resilient despite external challenges. However, due to hardening interest rates, a broad-based valuation re-rating is unlikely.

This makes the next year a stock-picker's market, where businesses with strong fundamentals, earnings visibility and reasonable valuations should be better-placed to generate returns.

Wishing you all a joyous and prosperous, Happy Diwali!

Bharti Airtel Ltd

Industry: Telecom

CMP: Rs. 1,948 | PT: Rs. 2,350

- India wireless ARPU improved to Rs. 264 (up 5.4% y-o-y, +2.6% q-o-q), driven by premiumisation, smartphone upgrades, higher data consumption and postpaid additions. Management continues to see meaningful headroom for ARPU growth as customers shift to higher-value plans and believes that a move to consumption-based pricing can support 4-5% annual ARPU growth even without tariff hikes.
- Africa operations continue to benefit from strong data adoption, rising smartphone penetration and increasing digital financial services usage across markets. Management is optimistic, supported by low telecom penetration levels and growing demand for mobile connectivity and financial inclusion services.
- Premiumisation and postpaid adoption accelerating: Airtel added 1mn+ postpaid subscribers in Q1FY27, while its 4G/5G user base reached 301.8 million. Fastlane (5G slicing), smartphone upgrades and rising data consumption continue to improve customer mix and monetization.
- **Key risks:** Delays in tariff/pricing rationalisation, slower ARPU growth, higher capex intensity across data centers and fiber, execution challenges in Homes/Nxtra, and adverse regulatory, currency or competitive developments in key African markets.

ICICI Bank Ltd

Industry: Banking

CMP: Rs. 1,377 | PT: Rs. 1,750

- ICICI Bank's consolidated balance sheet is strong at ~Rs. 32.9 lakh crore, with total loans of Rs. 18.32 lakh crore, deposits of Rs. 20.5 lakh crore. Total CRAR of 16.68% (and CET1 of 16.01%) provides ample growth capital, while PCR of 75% and standard, contingency and other provisions of Rs. 23,815 crore offer a strong cushion.
- ICICI Prudential Life, ICICI Lombard, ICICI Prudential AMC (market leader in equity AUM with 13.7% share), ICICI Securities (~16% MTF market share) and ICICI Home Finance together reported PAT of ~Rs. 5,240 crore in H1FY27.
- In Q2FY27, advances grew 30% y-o-y (24.1% ex-FCNR deposits), led by business banking (up 33.8%) and domestic corporate loans (up 30.6%); deposits rose 27.1% y-o-y. NII grew 17.7% y-o-y, while PAT grew 20.1% y-o-y to Rs. 14,843 crore, aided by a 20.1% fee income growth and low provisions. NIM fell 18 bps q-o-q to 4.18% on low-yield FCNR(B)-linked loans and costlier term deposits, but are expected to recover by Q4; GNPA/NNPA improved 18/5 bps q-o-q to 1.20%/0.30%, with credit cost at just 0.20%.
- The bank is a strong overall franchisee that is poised to post consistent returns. We expect ~19% NII/PAT CAGR over FY26-FY28E with RoA/RoE of 2.4%/17.1% in FY28E. We maintain Buy with PT of Rs. 1,750.
- **Key risks:** A slower-than-expected recovery in NIM and geopolitical uncertainties impacting asset quality.

Larsen & Toubro Ltd

Industry: Capital Goods

CMP: Rs. 3,801 | PT: Rs. 4,700

- L&T steps into the festive season with a record order book of Rs 8.54 lakh crore, reflecting a 15% y-o-y rise. The mix is also improving, as domestic private-sector projects now make up 45% of the book, against 30% a year earlier. Management sees an opportunity pipeline of about Rs 10 lakh crore for balance of FY27.
- International projects make up 54% of the order book, and the Middle East comprises 71% of that, which makes it ~37% of the total. Order inflows surprised, rising 28% y-o-y, o Rs 1.47 lakh crore, with international orders contributing 62%. Q2 order inflows across oil & gas, power transmission, and infrastructure segments. Q2 order inflows were a record owing to Q1 deferrals, which slipped in Q2FY27.
- L&T targets an order inflow growth and revenue growth of 10-12% y-o-y each, and a 7.8% OPM for core P&M business for FY2026. Order book stays at an all-time high of ~Rs 8.54 lakh crore, which is 3.1x TTM revenues. Order inflow prospects are at >Rs 10 lakh crore for the remainder of FY27.
- We maintain a Buy with an unchanged PT of Rs. 4,500 considering its strong order prospects and healthy earnings growth outlook.
- **Key risks**: Slowdown in domestic macros and geopolitical conflicts on the international front can affect its order prospects.

Titan Company Ltd

Industry: Consumer Discretionary
CMP: Rs. 4,337 | PT: Rs. 5,287

- Q2FY27's business update reflects a resilient, diversified retail portfolio. Healthy growth in jewellery, supported by premiumisation and a richer studded mix, besides strong momentum in watches and eyecare, positions company well for a stronger H2FY27 aided by a delayed festive season.
- Consumer businesses grew ~25% y-o-y in Q2FY27, while Titan added 78 net stores, taking its retail network to 3,758 stores. Domestic jewellery segment grew 21%, driven by *Tanishq, Mia, Zoya and beYon* (+20%) and *CaratLane* (+32%), despite softer demand towards quarter-end due to the festive calendar shift into Q3FY27.
- Titan continues to see strong headroom from formalisation, regional market share gains, studded jewellery, retail transformation, portfolio expansion, and growth in sub-Rs. 50,000 and sub-Rs. 1 lakh price points.
- **Key risks**: Growth remains driven more by higher ticket sizes than buyer additions, making demand vulnerable if gold prices fall or consumer spending weakens. Elevated gold-price volatility, potential reversal of jewellery MTM gains, intensifying competition across organised retail jewellery segment, and geopolitical disruptions in the GCC region affecting the Damas business could weigh on growth and profitability.

UltraTech Cement Ltd

Industry: Cement
CMP: Rs. 11,104 | PT: Rs. 13,500

- Domestic capacity is at 205 MTPA after 4.6 MTPA was added in September. The company is on track to reach a 240 MTPA capacity by March 2028.
- UltraTech has guided for a double-digit volume growth for FY27, against 7–8% for the industry. Q2FY27 grey cement volumes grew 13.8%, so UltraTech keeps gaining share.
- Management reiterated its target of Rs. 1,400 EBITDA per tonne by March 2028, up from Rs. 974 in Q2FY27. Price hikes, operating leverage and cost savings should drive this.
- UltraTech's large scale and flexible fuel mix (petcoke share cut to ~25%, green power at 48%) help it absorb fuel inflation better than its peers.
- **Key Risk**: Weaker macros leading to softer cement demand and price pressures.

Indian Hotels Company Ltd (IHCL)

Industry: Consumer Goods
CMP: Rs. 805 | PT: Rs. 928

- H1FY27 revenue grew 18% y-o-y, while FY27 revenue growth guidance was raised to 15-17%. We believe implied H2 growth outlook of 13-16% remains conservative, supported by a seasonally strong second half, a favourable wedding and MICE demand, 30+ planned hotel openings, the continued ramp-up of renovated assets, and better performance from international properties including London, The Pierre, San Francisco, and Frankfurt. In addition, the asset-light management fee business continues to scale rapidly, providing a high-margin growth avenue. With multiple growth levers intact and FY28 set to benefit from the OHL merger, IHCL is well-positioned to deliver industry-leading growth.
- Q2FY27 revenue grew 21.7% y-o-y to Rs. 2,484.32 crore despite West Asia-led aviation disruptions and weakness in the air-catering business. Operating profit grew 23.8% y-o-y to Rs. 705.8 crore and reported PAT grew 19.4% y-o-y to Rs. 379.9 crore, marking IHCL's 18th consecutive best-ever quarter.
- IHCL signed 47 hotels and opened 20 in H1FY27. Operational portfolio stood at 390 hotels/34,213 keys, while the signed pipeline stood at 280 hotels/34,800 keys, with 94% of under an asset-light model.
- **Key risks**: Demand disruption from travel or macroeconomic slowdown, weaker travel/MICE and wedding demand, oversupply in Tier 2/3 markets, delays in hotel openings or project execution, and higher-than-expected cost inflation.

Navin Fluorine International Ltd (NFIL)

Industry: Agri Inputs and Specialty Chemicals
CMP: Rs. 8,501 | PT: Rs. 9,500

- CDMO business remains a key growth engine, supported by strong execution, deeper engagement with a large European client, and increasing demand for existing molecules. Recently-approved cGMP4 expansion should enhance manufacturing capabilities and support future scale-ups .
- HPP segment continues to benefit from healthy demand, improving product mix and capacity additions. We remain positive on the R32 opportunity, as market dynamics should be assessed from a global demand-supply perspective rather than a near-term domestic capacity lens. NFIL's integrated and cost-competitive manufacturing platform, coupled with long-term customer relationships, should help sustain healthy utilisation and profitability.
- Specialty chemicals business is witnessing strong traction, supported by a growing order book and improving customer engagement. Rising exposure to patented and differentiated products provides a degree of insulation from broad industry pricing pressures, while productivity initiatives and debottlenecking should support profitability over time.
- Advanced materials is steadily progressing from product qualification to commercialisation, with multiple growth opportunities. Recent investments, customer validations and strategic partnerships indicate that the business could evolve into a meaningful high-margin contributor over the medium term.
- **Key risks:** Decline in R32 gas prices

Welspun Corp Ltd

Industry: Metals and Mining
CMP: Rs. 2,553 | PT: Rs. 3,150

- Welspun's largest-ever order win for Rs 17,200 crore ($1.8 bn) in the US for LSAW & spiral pipes lifts its global order book to a record $4.4 bn (Rs 42,100 crore); US capacity is booked through FY28.
- US business' run-rate set to treble from ~350,000 t to 600,000–700,000 t; new capacities to lift volumes to ~1.5 mn t from the latter part of FY28.
- FY27 revenue guidance of Rs 20,000 cr and EBITDA guidance of Rs 2,850 crore is maintained; EBITDA beat guidance in each year during FY24–FY26. Net cash position improved to Rs 2,336 crore with an ROCE of 23.1% (Q1FY27); guardrails are set at ROCE of >20% and net debt/EBITDA of <1x.
- Welspun emphasised that planned strategic capacity enhancements in the US and Saudi Arabia are on schedule to be activated by FY27, bolstering the company's international manufacturing presence and solidifying its dominance in the global line pipe sector. At CMP, the stock trades at 25x/19x EV/EBITDA.
- **Key risks**: Geopolitical concerns, volatility in input costs and commodity prices.

MIRAE ASSET Sharekhan

Tata Consumer Products Ltd

Industry: Consumer Goods

CMP: Rs. 1,000 | PT: Rs. 1,197

- H1FY27 numbers were strong, on robust volume growth and continued scaling up of its high-growth portfolio, with *Tata Sampann, RTD, Capital Foods and Organic India* growing 40% y-o-y and contributing 38% of India revenues. While India business' margins stayed stressed due to elevated tea, salt and packaging costs, management expects them to rise from Q3FY27. led by recent price hikes. Improving profitability in the International business, easing coffee cost pressures and a recovery in Tata Starbucks further support earnings outlook.
- With management guiding for >30% growth in growth segments and eyes medium-term India EBITDA margins of 17-20%.
- Q2FY27 revenue grew 14% y-o-y (11% in CC terms) to Rs. 5,661.1 crore, driven by 11% underlying volume growth in India. EBITDA grew 16.6% y-o-y to Rs. 783.2 crore, with margins rising 31 bps y-o-y to 13.8%, supported by strong performance in the international and non-branded segments.
- AI initiatives are being scaled across sales, trade-spend optimisation and manufacturing processes to improve productivity and execution.
- **Key risks**: Rising costs could hit margins, slower demand recovery could impact revenue growth. Higher competition may drive up promotional spending.

Radico Khaitan Ltd

Industry: Consumer Goods

CMP: Rs. 4,135 | PT: Rs. 5,012

- Vodka remains the key growth driver, with volumes rising 49% y-o-y to 2.96 million cases in Q2FY27. *Magic Moments* continues to dominate with ~60% market share, while vodka now accounts for 6.3% of the IMFL industry. Premium whisky brands *8PM Premium Black* and *After Dark Blue* are also gaining traction.
- Gross margins grew 440 bps y-o-y to 48% in Q2FY27, led by a richer product mix and timely procurement of grain inventory ahead of commodity price increases. Management has upgraded FY27 Prestige & Above (P&A) volume growth guidance to 30%, while reiterating its ~20% EBITDA margin target.
- Balance sheet continues to gain strength, with net debt falling to Rs. 175 crore. Interest costs fell 30% y-o-y, and management expects the company to become net debt-free in H2FY27.
- Regulations stay favourable. Duty rationalisation in Karnataka is benefiting premium brands, while Tamil Nadu is showing encouraging signs for premium liquor consumption and market expansion.
- **Key risks**: Margin gains from low-cost grain inventory may moderate in H2FY27 as input costs normalise, while inventory build-up has increased working capital needs. Continued weakness in regular-category volumes could also weigh on overall growth.

Dee Development Ltd

Industry: Capital Goods
CMP: Rs. 547 | PT: Rs. 750

- Order book stands at Rs 2,531 crore as of September 2026 roughly double the FY26 revenues indicating a revenue visibility for next two years. It eyes order inflows of Rs 2000 crore for FY27 of which around Rs 900 crore of order inflows have been gathered by H1 2027. With a strong opening order book and higher order inflows management targets to close the order book at Rs 3,000 crore by FY27-end. The Thailand capacity is fully booked for the year and looks forward to close FY27 with a revenue of Rs 170-200 crore.
- With its recent order inflow gains, Dee is rapidly emerging as highly specialized and critical energy infra provider and enjoying sector tailwinds in HRSG, thermal and oil & gas-based solutions. The company highlighted strong demand visibility from GE Vernova, Nooter/Eriksen, Siemens, and other global OEMs linked to rising gas turbine and power infrastructure demand driven by AI data centers and global electricity shortages.
- Dee has signed an MoU with Siemens for continuous gas turbine (GT) piping business starting next year, with 10 units in Year 1, 15 in Year 2 and 25-30 in Year 3. If this MoU converts company would see lumpy business from Siemens. Siemens team to visit Anjar facility to clear plans for more business
- **Key risks**: Downtrend in the oil & gas and power segments, raw material price volatility.

MIRAE ASSET Sharekhan

Karnataka Bank Ltd

Industry: Banking
CMP: Rs. 311 | PT: Rs. 415

- Karnataka Bank's total business hit a record Rs. 1.97 lakh crore in June 2026. It has run down its low-yield IBPC/food-credit book (Rs. 4,057 crore in Mar-25 to Rs. 1,375 crore in Jun-26), set up retail credit hubs across all 15 regional offices, built mid-corporate, credit-monitoring and recovery teams, with settled leadership under MD & CEO Mr. Raghavendra S Bhat.
- LOS revamp, risk-based (CIBIL/LTV) pricing, digital retail journeys and FDs, secured cards, AI voice bots and government-led business (GST, customs, CBDT) should ease cost-to-income from 56.3% in FY26 to ~52% by FY28E.
- In Q1FY27, advances grew 17.0% y-o-y, NIM recovered to 3.20% (from 2.82% in Q1FY26), RoA rose to 1.29% and GNPA/NNPA eased to 2.58%/0.87%; CRAR of 21.1% is among the highest in the industry.
- At ~0.7x FY28E P/BV, the stock is the cheapest among old-private/mid-cap peers (~1.4x) due to its historically sub-1% RoA. With 15–20% loan growth guidance, 3%+ NIM and RoA moving towards 1.35-1.40%, we expect ~16% NII/PAT CAGR over FY26-FY28E and a re-rating; we value it at ~1.0x FY28E BV.
- **Key risks:** Regional concentration in Karnataka, leadership continuity and a possible impact of the West Asia crisis on asset quality.

Lumax Auto Technologies Ltd

Industry: Auto Ancillaries
CMP: Rs. 2,043 | PT: Rs. 2,490

- Lumax is confident of outperforming the industry despite inflationary headwinds as an increase in content per vehicle drives up market share. Revenue guidance raised to ~Rs. 6,000 crore and margins are expected to sustain in FY27 while long-term target of achieving a 20% revenue CAGR and 20% EBITDA margins by FY31 remain intact.
- Orderbook is at a robust Rs. 1,879 crore, spread over three years - with 14% expected in FY27, 59% in FY28 and the remainder in FY29. About 85% of orderbook is from new businesss. Advanced plastics/Mechatronics /Structure and Control systems/Alternate fuels constitute ~44%/27%/8%/20% respectively, reflecting healthy traction across product verticals.
- We factor in a revenue/EBITDA/PAT CAGR growth of 18%/29%/29% respectively over FY26-FY28E. We value the company at 14x its FY28E EBITDA to arrive at the price target.
- **Key risks**: Slump in H2 growth normalisation (flagged by management itself) or delays in the Manesar/ Chakan/Nashik plants' commissioning could compress multiples from current premium levels. Higher-than-anticipated commodity price pressure could dent profitability despite price hikes and slower indexation from OEMs.

Sagility Ltd

Industry: Information Technology
CMP: Rs. 45 | PT: Rs. 53

- Sagility reiterated its low double-digit organic constant-currency revenue growth guidance for FY27 despite expecting OE/AEP revenue contribution to be at ~100 bps lower y-o-y. It also raised adjusted EBITDA margin guidance to 25-26% from 24-25%, supported by operating leverage, delivery efficiencies, favourable geographic mix, forex tailwinds and growing AI-led productivity benefits.
- While the provider business currently contributes only ~10% of revenue, the management is accelerating investments in this vertical through a dedicated GTM strategy and the acquisition of Chirok Health. Chirok adds $13mn in TTM revenue, 35.8% adjusted EBITDA margins, 115% net revenue retention, and strengthens Sagility's end-to-end RCM capabilities, creating significant cross-selling opportunities.
- Sagility stated that improving demand trends across healthcare payers, supported by utilisation management modernization, payment integrity, care management and member engagement initiatives. It continues to benefit from deep relationships with leading US health plans, with the top 5 clients contributing nearly 70% of revenues and providing significant wallet-share expansion opportunities.
- **Key risks**: Slowdown in AI adoption, unfavorable policy change in US healthcare, appreciation of rupee currency against USD.

VA Tech Wabag Ltd

Industry: Capital Goods

CMP: Rs. 1,807 | PT: Rs. 2,400

- Order book reached an all-time high of about Rs 19,400 crore as of Q1FY27 indicating a 4x revenue growth potential over base of FY26. The Middle East is about 35–40% of the backlog, and overseas projects typically bring tighter payment terms. Balance sheet is strong, with net cash for the 14th consecutive quarter at Rs 965 crore. Wabag highlighted a strong order pipeline across Middle East desalination, solar manufacturing water systems and CBG-related opportunities in India. The bid pipeline remains strong at $2-3 billion, while the domestic pipeline remains at Rs. 100-150 crore.
- New age segments include ultra-pure water for semiconductors, data centers, solar PV manufacturing, and green hydrogen production and are considered decadal opportunities, expected to become meaningful over 3-5 years. WABAG has already started winning in this space, with a roughly ₹465 million order for a RenewSys solar cell facility covering ultra-pure water, effluent treatment and zero liquid discharge.
- Wabag reiterated FY27 revenue growth guidance of 15–20% and expressed confidence in reaching the higher end of the range with margins in the range of 13-15%. With 4x revenue visibility and higher international revenues we see lower downside to the guidance and expect to outperform the guidance of FY27.
- **Key risks**: Lumpiness in order book execution and non-payment of dues.
